Wyoming County Deploys EM Systems' Jail Management System Software

Amherst, NY, 12/06/07 – EM Systems, Inc. announced today that their new Jail Management System (JMS) software has been deployed at the Wyoming County Jail in Warsaw, New York. The software was designed to assist in the management of a detention facility and provides tools to track both inmate and facility data. The system was deployed on September 30 and has effectively replaced Wyoming County's previous JMS software. EM Systems' personnel worked closely with Sheriff Farris Heimann and Captain Bruce James from the Wyoming County Sheriff's Office in development of the system.

The new JMS software was integrated into EM Systems' existing software suite. The suite includes Computer Aided Dispatch (CAD), Records Management System (RMS), Jail Management System (JMS), Arrest/Booking, Mobile Data System (MDS) and Automatic Vehicle Location (AVL), as well as numerous other customized application modules.

EM Systems converted all of the data from Wyoming County's state-supplied JMS program used prior to installation of the new Jail Management System. The program included a digital camera for integrated mug shot capabilities and an interface to the National Victim Notification Network (VINE) to automatically update the jail population and release information.

The principal mission of the Wyoming County Sheriff's Office is to preserve the rights of citizens and reduce fear in the community through the prevention of crime, protection of persons and property, and the maintenance of order in public places. To anticipate and respond to events that threatens public order and the protection of life and property. Additional information about the Wyoming County Sheriff's Office is available at: <http://www.wyomingco.net/sheriffdept/Sheriff.htm>.

EM Systems, Inc., headquartered in Amherst, NY, provides computer consulting services and custom software development. EM Systems has been developing integrated public safety solutions since the early 1990s, teaming with local public safety agencies to create highly intuitive and dynamic solutions. EM Systems products are currently being used by 24 agencies throughout Western New York to communicate and share information. Additional information about EM Systems and their products is available at: www.em-sys.net.
